

HARDWIRE INSTALLATION INSTRUCTIONS FOR *ARTOS*[®] TOWEL WARMERS

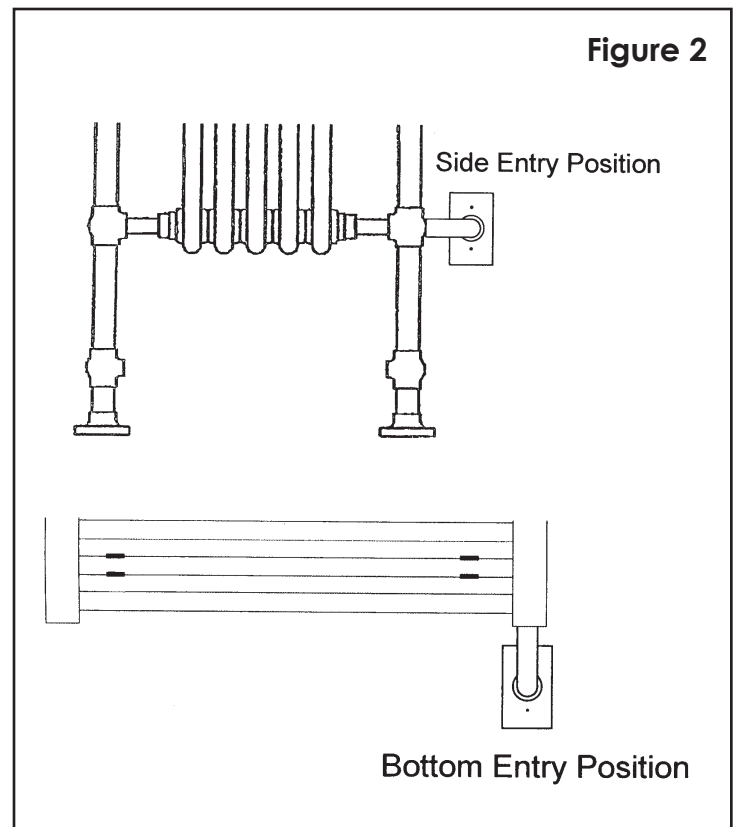

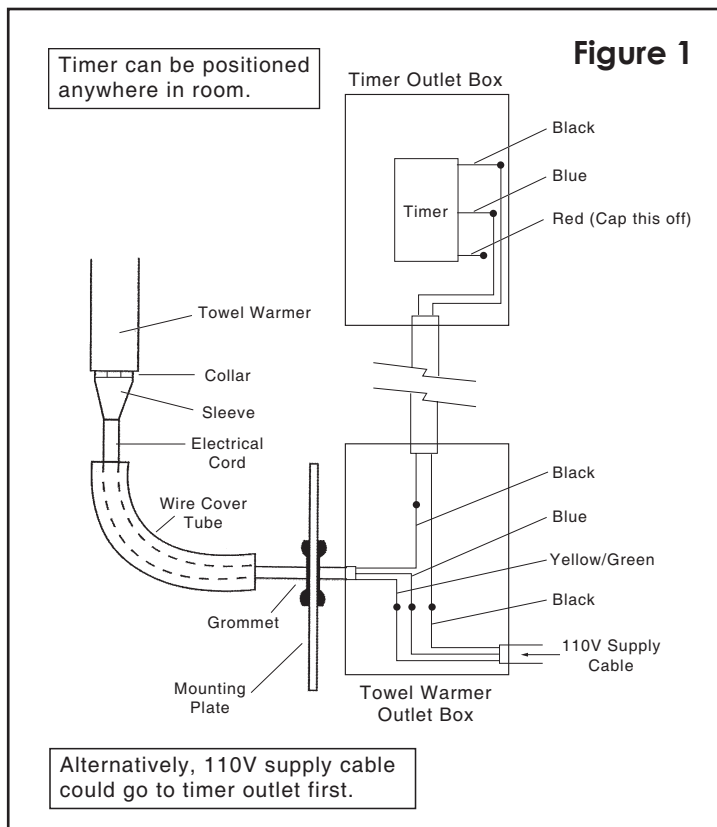

Heating Elements 110V

Element conforms to UL standards.

Unit conforms to CSA standards. File ref: 229718

Attention: Do not connect the heater to the network before having read and understood the following instructions.

1. Fix towel warmer to the wall according to fitting instructions. Towel warmers must be installed vertically. See technical spec sheet of towel warmer to determine model # and entry position of hardware kit as illustrated below. (Fig. 2)
2. Turn OFF the power supply.
3. Feed the cord first through the tube, then through the mounting plate.
4. Do all necessary electrical connections as shown in the wiring diagram below. (Fig. 1)
5. Push tube up towel warmer cord over plastic sleeve until it touches the hexagonal chrome collar.
6. Push mounting plate onto tube.
7. Screw mounting plate to the towel warmer outlet box using the screws provided.
8. Adjust where necessary.

WARNING

In case of damages or failures of the rail/connection, the towel rail should be returned to the manufacturer or their distributor. The warranty of 1 year from the manufacturer is NOT VALID in case of improper use or installation. Product designed for use in Canada and USA only.
